Hello Nell

Thank you for your enquiry and we can provide this product. It is not a stock item but we get monthly shipments in from this supplier and we have one leaving at the end of the week.

Derm-Duet™ II, 15x100mm biplate, individually bagged, room temp. storage, order by the package of 10, by Hardy Diagnostics

Derm-Duet™ II is a 15 x 100mm biplate with one section for DTM (Dermatophyte Test Media) and the other section for RSM (Rapid Sporulation Media) for the culturing of hair, skin and nails for dermatophytic fungi. Each Derm-Duet™ is individually wrapped and can be stored at room temperature.

DTM II will turn red within a few days when a dermatophytic fungus is present. Dermatophytes include Trichophyton spp., Microsporum spp., and Epidermophyton spp. The RSM side will induce the organisms to produce spores (macroconidia) which can be viewed microscopically for identification. RSM media will also turn blue to blue-green in the presence of dermatophytes.

Cat	Description	Size	Price
HDJ175	Derm Duet II HDx, 15x100 biplt 10/bx	10	\$ 83.00

The above price is GST exclusive and delivery is \$40.00.

Kind regards

Subject: Derm-Duet™ II DTM/ RSM Biplate (Dermatophytes Test Medium/ Rapid Sporulation Media) biplate, 10/pk J175

Dear Trevor,
I run the Sydney University distance education course in veterinary dermatology
I wonder if you supply - within Australia :

**Derm-Duet™ II DTM/
RSM Biplate**
(Dermatophytes Test Medium/
Rapid Sporulation Media)

Individually wrapped,
long shelf life, room temperature storage. 15x100mm biplate,
10/pk J175

and if so through which supplier ?

I know loads of veterinarians who only seem to be able to purchase Fungassay (DTM slopes) and this is not adequate for our needs (we need flat plates to be able to properly seed the agar

and if not .. then my alternative would be just ordinary everyday DTm media plates - do you supply those and how much do they cost (not optimal for normal vets as they have such short shelf-life) ...

Hopeful you can help me :)

sincerely,
Sonya Bettenay
